CRITICAL: Ransomware C2 Response

Executive Summary

Active ransomware C2 communication detected. Immediate isolation required.

Immediate Containment (T+0 to T+15 min)

1. IMMEDIATELY isolate all affected systems from network
2. Preserve memory dumps before shutdown
3. Activate incident response team
4. Notify CISO and legal counsel

Forensic Preservation

- Take full disk images of all affected systems
- Capture network traffic pcaps
- Document all IOCs: hashes, IPs, domains, registry keys

Eradication Steps

1. Identify Patient Zero via EDR telemetry
2. Remove malware persistence mechanisms
3. Patch exploited vulnerability CVE-2026-XXXX

Recovery

1. Restore from clean backups (verify integrity first)
2. Rebuild affected systems from golden images
3. Reset all credentials for affected accounts

[AI] AI Threat Narrative

AI-Generated Threat Analysis

This incident matches the behavioural profile of a **REvil/Sodinokibi** variant.

Confidence Assessment

Indicator	Match	Confidence
C2 traffic pattern	Yes	94%
File encryption sequence	Yes	91%
Lateral movement footprint	Partial	72%

Recommended MITRE Coverage

Ensure your detection coverage includes T1486, T1489, T1490, T1491.

[SIGMA] Sigma Detection Rule
